An Invitation to You

You are cordially invited to visit our nurseries during the growing season in 1953. From mid-July until frost our fields are truly breath-taking in their beauty — a magnet for the flower grower and color picture fan alike. Our nurseries are conveniently located right on US Route 1, the main line of vacation travel. Now under the new ownership of M. A. "Glad" Morgan, we plan to expand our planting acreage in 1953. A new irrigation system will make this possible. Visitors find our trial garden, where the newest gladiolus varieties may be seen, a major attraction.

Excellent growing conditions in 1952 make possible a choice offering of bulbs this year. These bulbs will produce wonderful blooms in your garden. We intend to expand our listings of the newest gladiolus introductions as well as the tried and tested varieties. To avoid disappointment, place your order early — we will ship whenever you tell us to.

We are always glad to see you or hear from you. If you can't pay us a visit in person, be sure to watch for our gladiolus showings at the New England Gladiolus Show and other shows throughout New England.

Cordially yours,

The Seabrook Nurseries Folks

IDENTIFICATION OF GLADIOLUS

Do not send a single bloom inside a letter. When the letter goes thru the stamping machine at the post office all the moisture in the bloom is pressed out on the writing in the letter and is so blurred one can not make out its meaning and the crushed bloom so damaged it can not be identified. Just send a part of the stem with 3 or 4 buds on and leave enough stem for us to place in water for the bud to open. Do not send the very tip of the spike and do not put any wet paper or anything moist whatever in the package.

FORMULAS FOR DIPS AND SPRAYS FOR THE CONTROL OF THRIPS

Lysol Dip

- 4 tablespoons of Lysol
- 3 gallons of water
- or
- 1 pint of Lysol
- 25 gallons of water

Soak bulbs in the Lysol solution for at least 3 hours and no longer than 6 hours; soak bulblets overnight for 12 to 14 hours. After bulbs or bulblets are removed from the solution, allow to drain for 30 minutes and plant same day as treated, preferably while still wet.

The thrips problem is now satisfactorily solved — a great blessing to all concerned.

Thrip Spray

- 2 ounces Tarter Emetic
- 2 ounces brown sugar
- 3 gallons water

Mix well and spray weekly after foliage is in third leaf.

- or
- $\frac{1}{2}$ lb. DDT (50%)
- $\frac{1}{2}$ pint liquid soap (Germicidal)
- 25 gallons of water

For small plantings the following DDT spray is reported as giving good results:

- 1 rounded teaspoonful DDT (50%)
- $\frac{1}{2}$ teaspoonful Dreft
- 1 gallon water

DUSTING —The easiest and most efficient means of controlling Thrips is to dust the foliage of the plants with 5% DDT. Many types of dusters are available and one can be obtained to suit your size planting. Begin dusting when plants are in third leaf and continue about every two weeks. If this is done you can say goodbye to Thrips.

CAUTION: Lysol, New Improved Ceresan, Tarter Emetic, and DDT are poisonous and care should be taken in handling and storing these materials.

CARE AND CULTURE OF GLADIOLUS

Select a sunny location away from the roots of trees and shrubs. Plant about six inches deep, having bulbs five inches apart.

Place bulbs in a well worked trench in staggered or zigzag row— . . . and cover at first with about two inches of loam; when shoots begin to appear, work balance of loam into the trench. At all times keep the soil loose. As an aid to producing larger blooms work in fertilizer around the plants when about a foot or more in height. At the time flower spikes appear, abundant watering is very beneficial.

Bulbs should be dug before leaves turn brown. Cut stock close to the bulb, spread them out to dry for two or three days in a sunny location and then place in an open shed or room for two weeks or more before storing them away in a cool dry place. Keep them spread out and not over three inches deep, give bulbs an occasional airing during the winter. DO NOT remove the husks as this protects the bulb during storage.

When cutting flowers, leave at least four leaves remaining on the plant. Positive injury to the blooming qualities of the bulbs for the following year will occur if this precaution is not heeded.

For cut flowers, cut the spike when first bud fully opens. The remaining buds will open nicely and give a longer period of bloom and greater enjoyment.

Remove wilted blossoms, change water and cut off a portion of the stems each day. These will then fit in a smaller vase.

SIZE IN BULBS

In retail list, the large bulbs that we offer are 1¼ inches and over in diameter; medium size are ¾ inch up. For Wholesale sizes see list.

Beside the originator's name we have listed the approximate flowering season of each variety as follows:

E—Early, under 70 days from planting.

GLAD-I-O'LUS:—

Please pronounce this wonderful flower right. The accent on the O.

GLAD-I-O'LUS and use the same form for both singular and plural. It hurts to hear one say GLADIOLA or GLADIOIUS!

DO GLADS CHANGE COLOR? GLADIOLUS do NOT Change Color.

We have been asked this question hundreds of times. So many varieties divide or split. Suppose you plant twelve mixed bulbs, when you dig them you find you have about thirty bulbs. This is the reason you have more of one color than others. Many varieties do not divide, so you dig only one new bulb on the one you planted. And some not quite so strong just die in the ground.

Of course glads grow older each year, you dig a new bulb not a young one. So it is best to keep adding more bulbs to your collection each year.

PLANTING TIME

Our planting time here is around APRIL to JUNE, so when ordering your bulbs to be sent to you at planting time, please state when planting time is in your locality. It will help us a lot.

WHEN YOU CHANGE YOUR ADDRESS

Please notify us so we can change our files. Also please give your old address at the same time. This will save us many catalogues and you will receive yours. THANK YOU.

C. O. D. ORDERS

Please do not ask us to send an order C. O. D. without your making a deposit on it. If it is a small order we shall have to ask for a deposit of at least a dollar. Larger C. O. D. orders should be accompanied by 25% of the value.

We cannot send out any more C. O. D. orders without at least some deposit.

PLEASE READ CAREFULLY BEFORE ORDERING

GUARANTEE

We guarantee to do our utmost to please our customers. We mean to send out only clean bulbs, free from disease and insects. Any claims or complaints in regard to bulbs should be sent soon after receiving the bulbs.

Of course if any bulbs are not true to name you can not make claims for that until after blooming. If anything goes wrong we always try to make a satisfactory settlement with the customer. This is the only way that anyone can hope to build up a business.

However we do not guarantee in any way *the bulbs you harvest* as unsatisfactory growing conditions or disease in the soil are beyond our control and we cannot be responsible for the crop you harvest except that if the bulbs should not be true to name we will be glad to replace them or make a satisfactory settlement.
